Gross Density Study for Pre-School, School Age, and 65+ population per  
Census Tract and by Acre in R-50

Attached in the density study for the Roxbury-North Dorchester GN  
per Census Tract. I went one step beyond and broke down the Pre-School  
Age Children (under 5), the School Age Children (5-18) and 65+ population  
densities per number of persons for each age bracket per acre.

I needn't remind you that these figures reflect gross density because  
I had to include the streets when computing the Tract acreage because of the  
time element.

The second point is that the Tract population percentages were taken  
from The Penny Starr report - again because of the time element.

Oct 2 1967

**SUBJECT:** Gross Density Study for Pre-School Age,  
School Age and 65+ Population per Census Tract  
and by Acre in R-50

<u>Tract</u>	<u>Acre per Tract</u>	<u>Pre School population per Tract</u>	<u>Pre School population per persons per Tract</u>	<u>School Age population per Tract</u>	<u>No. School Age persons per tract</u>	<u>65+ population per Tract</u>	<u>No. persons 65+ per acres</u>
